

(20 March, 2007, Hong Kong) Media-Go Engineering Ltd. successfully demonstrated the cutting edge technologies in the 2nd International Audio, Lighting & Performance Entertainment Exhibition which is taken place in the Macau Tower Convention & Exhibition Centre from 14-16 March 2007. This largest Audio, Lighting & Performance Entertainment exhibition in Macao attracted over 12,000 visitors in these three days. Media-Go is the only exhibitor who showed the completed audiovisual solutions for hotels, casinos and even commercial buildings.

At the ALP exhibition, MG illustrated the integration of different sophisticated system from Aethra – Videoconferencing system, Alcorn McBride – Show Control System, nStream – Hotel TV System, Orion – Display Wall System, Symetrix – Audio Processing System, and Vaddio – Camera Control System. The interoperability of these systems assembled a seamless, advanced and user-friendly audiovisual solution to the Macao Market.

Jeff Ng, Director of Sales, Media-Go Engineering Ltd commented. “The overwhelming response from the visitor strengthened our confidence to the market in Macao. We believe that our millions dollars investment for expanding our Macao branch office is worthwhile and will be rewarding.”
