

**PolyVision® continues to lead the industry with environmentally responsible visual communication solutions.**

**Chicago, IL (November 7, 2007)** – PolyVision Corporation, A Steelcase Company (NYSE:SCS) and the world leader in visual communication products, continues to be at the forefront of the industry in environmental responsibility and stewardship at Greenbuild International Conference and Expo this year.

In response to increasing global environmental issues, and in line with the belief that social responsibility is an important business practice, PolyVision has developed strong environmental guidelines known as eVision™. eVision is the company's corporate environmental policy that provides guiding principles for research and development, and a methodology for continual evaluation of resources and processes for new and existing products.

"PolyVision is dedicated to setting an example with the development and distribution of products that meet evolving ecological needs," says Mike Dunn, President and CEO of PolyVision Corporation. Today PolyVision is the industry leader; the only company to offer a complete range of environmentally responsible visual communication products with GREENGUARD Indoor Air Quality®, GREENGUARD Children and Schools™ and Cradle to Cradle™ Silver certifications, including PolyVision's best-selling Premium Whiteboard, Edge™. Premium Whiteboards, like all PolyVision markerboards, feature *e<sup>3</sup> environmental ceramicsteel™* writing surface, the first product to achieve global Cradle to Cradle certification.

Mike Dunn continues "we are proud to be at the forefront of environmental stewardship and are committed to developing products that enable more environmentally responsible work practices, such as RoomWizard™."

PolyVision's award-winning RoomWizard Room Scheduling System reduces its environmental footprint by working in a paperless world, allowing users to schedule meeting rooms and invite attendees online. When combined with other PolyVision products such as CopyCam® Image Capturing System, One-Click Publishing™ allows RoomWizard to compile meeting notes and automatically email them to all attendees, without using a single sheet of paper!

PolyVision's Edge™ Premium Whiteboard featuring *e<sup>3</sup> environmental ceramicsteel* writing surface and RoomWizard Room Scheduling System will be showcased in the Steelcase booth #812 at the Greenbuild International Conference and Expo, which takes place November 7-9, 2007, in Chicago, Illinois.

**About PolyVision Corporation, a Steelcase Company**

PolyVision is a worldwide leader in visual communication products that enhance the way people learn, work and communicate. Since 1954, PolyVision has focused on creating solutions that inspire users to be more productive, effective and creative when collaborating and communicating visually. Whether it's

developing the world's number one selling e<sup>3</sup> *environmental ceramicsteel™* surface, leading the industry with a corporate environmental strategy, launching the industry's first multimedia interactive whiteboard, or taking visual communication tools to the next level with our Thunder™ Virtual Flipchart™ system, PolyVision has the solution for your collaboration needs.
